DETAILED ACTION

Application Status

1. In a preliminary amendment, Applicants cancelled Claims 1-90 and 134-140. Claims 91-133 are pending in the instant application.

Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- KK
10/22/02
- I. Claims 91-12⁷, drawn to compounds, complexes thereof, and cells containing said complexes, classified in class 546, subclass 117.
 - II. Claims 128-132, drawn to methods of dimerizing fusion proteins in a cell, classified in class 435, subclass 7.2.
 - III. Claim 133, drawn to methods of identifying molecules that bind a known target, classified in class 435, subclass 7.2.

3. The inventions are distinct, each from the other because of the following reasons:

Group I is related to Groups II and III as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the compounds can be used for a materially different process of using that product, such as in drug treatment therapies. Thus, Group I is patentably distinct from Groups II and III. Because these inventions are distinct for the reasons given above and have

Art Unit: 1652

acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Groups II and III are related as methods using the complexes and/or compounds of Group I. However, these methods are distinct because they use other, different reagents, utilize wholly distinct method steps, and produce different products. Thus, Groups II and III are patentably distinct. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

Election of Species

4. This application contains claims directed to the following patentably distinct species of the claimed invention: the compounds of claims 96 and 106-110.

If Applicants elect Group I ^{or} ~~of~~ Group II, Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 91-95 and 97-105 are generic as well as all the Claims of Group II.

The species noted above are patentably distinct inventions because they are distinct chemical structures.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 1652

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.

Election

5. A telephone call was made to John White on September 2, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

Conclusion

6. A complete response to the instant Office action must include an election of invention AND an election of species (unless Group III is elected).
